

# PRODUCT CARE GUIDE

## How to care for your new furniture

Keep furniture away from direct sunlight and direct heating sources as this can cause timber expansion and cracking.

Wipe furniture regularly with a soft damp cloth, avoid using disinfectants and cleaning products on the furniture as it may cause imperfections and discoloration to the stain

Use coasters where possible to help protect surfaces from peeling, scratching or discoloration.

Avoid spilling liquids and solvents such as perfume onto furniture.

Do not have direct body contact with furniture as body oils and products will affect furniture and void warranty.
